Proudly Presents

Green Home Developers (GHD) is a brainchild of Sri K. Ramesh Reddy who has actively been involved in real estate sector for over 17 years. Gaining vast experience, drawn from early years in buying / selling properties across Tirupati, Nellore and Bangalore etc., he laid the foundation for the GHD in the year 2011 which in very short period of time managed to craft for itself a unique position in the real estate sector in Tirupati AP, India.

NRI Cloud City is one of the prestigious projects which is borne out of the concept of “HIGHER ROI on Low Investment”. As part of the project and to enhance the beauty of it, Teak trees are going to be planted in the sites. The trees planted will generate additional income to the plot owners. Each and every part of the “Teak Wood” is useful. It is used in the manufacture of furniture, Carvings etc. These trees can be harvested 10th year onwards.

We are happy to tell you that we will take the all responsibility of generating income for you through these trees. We will grow these trees, harvest them, and help our customers get income through it by selling it in the market.

Please, take note of it that you are buying the plot only. But we take responsibility from planting, growing, harvesting and till selling in the market. The good news is, you are not going to invest a single penny for this entire process and you will get additional income from your unused plot. Also, by doing so, we make our project greener.
